

Back to School Success Tips

Find out what your child is expected to learn this new school year.

Here are 3 ways to team up with the teacher!

Dear Teacher letter

Help the teacher get to know your child using the Dear Teacher letter to share your child's interests, strengths, and where they need more support.

Readiness Check

Use this tool to find out what your child is expected to learn this year. This tool will allow you to see how they are doing with grade-level math and reading skills. You don't have to be a math or reading expert though. Just ask your teacher what "grade level" looks like and how you can support.

3-Step Planning Tool

Use this tool to help make the most out of the parent-teacher conferences and stay connected with your child's teachers! Grades are only one part of the story. Ask teachers about the different ways to know how your child is progressing.
